PHYSICA A

Abstracted/Indexed in: Current Contents: Physical, Chemical & Earth Sciences/EI Compendex Plus/Engineering Index/INSPEC

Volume 253, Nos. 1–4 **1 May 1998**

Contents

Random systems

Heisenberg spin glass on a hypercubic cell
D.A. Stariolo 1

Connection between dispersive transport and statistics of extreme events
K.W. Kehr, K.P.N. Murthy and H. Ambaye 9

Multifractal specific heat
A. Bershadskii 23

Categorization in a layered neural network
J.A. Martins and W.K. Theumann 38

Nonequilibrium neural network with competing dynamics
P.L. Garrido, J. Marro and J.J. Torres 57

Fluids, solids, interfaces and supramolecular fluids

Brownian dynamics simulation of needle-spring chains
A. Mikkelsen, K.D. Knudsen and A. Elgsaeter 66

The viscosity of a moderately dense, polydisperse suspension of spherical particles
E. Wajnryb and J.S. Dahler 77

Dynamical processes

The transition from deterministic chaos to a stochastic process
H. Kantz and E. Olbrich 105

Quantitative characterization of spatiotemporal chaos. II. Dynamic aspects and anomalous scaling
H. Shibata 118

Quantitative characterization of spatiotemporal patterns
H. Shibata 134

Long-range correlation properties of area-preserving chaotic systems
A. Adrover and M. Giona 143

A similar extension of the WKI hierarchy, its Hamiltonian structure and the associated finite-dimensional Hamiltonian system
J. Zhimin 154

Radiation-induced reduction of a wave packet in a magnetic field
A.Yu. Smirnov 161

Stretched exponential-like impurity relaxation in the $S = 1/2$ XY chain: a numerical study
S. Sen and T.D. Blersch 178

Identical particles and strong dynamical localization on the Möbius strip
C.R. de Oliveira and G.Q. Pellegrino 188

Contents continued inside

PHYSICA A
Volume 253, Nos. 1–4 **1 May 1998**

Contents (continued)

Comparison of mean-field and Monte Carlo approaches to dynamic hysteresis in Ising ferromagnets
M. Acharyya 199

A generalized Einstein relation for flux-limited diffusion
M. Zakari and D. Jou 205

Approximate solutions of a class of complex nonlinear dynamical systems
G.M. Mahmoud 211

Real processing II: Extremal principles of irreversible thermodynamics, relations, generalizations and time dependence
B. Reiser 223

Quantal Euclidean mappings
A. Rigo, M. Casas and A. Plastino 247

The Gambier mapping, revisited
B. Grammaticos, A. Ramani and S. Lafortune 260

Equations of motion in nonequilibrium statistical mechanics for nonextensive systems
A.K. Rajagopal 271

Path integral approach to fluctuations in relativistic transport
F. Vázquez and J.A. del Río 290

Onsets of avalanches in the BTW model
A. Bhowal 301

Effects of randomness and spatially dependent relaxation on sandpile models
P.-M. Lam, I. Akanbi and D.E. Newman 307

Phase transition in a computer network model
A.Yu. Tretyakov, H. Takayasu and M. Takayasu 315

Learning the reversed-wedge problem using a multi-interacting perceptron with correlated weights
E. Botelho 323

Optimal supervised learning with two teachers
M.A.P. Idiart, E.L. de Santa Helena 333

On modeling epidemics. Including latency, incubation and variable susceptibility
E. Ahmed and H.N. Agiza 347

Phase transition and critical phenomenon in traffic flow model with velocity-dependent sensitivity
T. Nagatani 353

Theoretical approach to biological aging
R.M.C. de Almeida, S. Moss de Oliveira and T.J.P. Penna 366

Metric adaption for analog forecasting
K. Fraedrich and B. Rückert 379

Scaling in the market of futures
E. Scalas 394

Dynamical optimization theory of a diversified portfolio
M. Marsili, S. Maslov and Y.-C. Zhang 403

Contents continued on previous page

PHYSICA A
Volume 253, Nos. 1–4 **1 May 1998**

Contents (continued)

Mathematical statistical physics

Singularities of the effective fugacity on the Ising model on the Cayley tree
J.C.A. Barata, E. Borges Jr., and W.P. Germano 419

On minimal/maximal ground-state thresholds in uniform classes of 2D $\pm J$ Ising models
J. Bendisch and H.v. Trotha 428

The Potts model on the Bethe lattice
F.S. de Aguiar and S. Goulart Rosa Jr. 448

Phase diagram in a continuum model of the classical Heisenberg ferromagnet: mean spherical approximation
T.G. Sokolovska 459

Finite-size-scaling study of a generalized quantum hard-rod model in a longitudinal magnetic field
A. Bassir, C.E. Bassir, A. Benyoussef, A. Klümper and J. Zittartz 473

Orientational ordering transition in a continuous-spin ferrofluid
S. Romano and V.A. Zagrebnov 483

Self-consistent linear response approximation for quantum many-body systems
T. Toyoda 498

Quantum corrections for general partition functions
L.R. Evangelista, L.C. Malacarne and R.S. Mendes 507

Two-centre double delta-function potential in one dimension
S.H. Patil and A.S. Roy 517

Analytic solution of a set of discrete Boltzmann equations
J.R. Schmidt 530

High-frequency photoabsorption by an ion immersed in a plasma as calculated from Bloch's hydrodynamic model
K. Ishikawa and B.U. Felderhof 541

Projected moments in relativistic kinetic theory
H. Struchtrup 555

Cumulative author index of Volumes 251 to 253 594

Index of authors and papers to Volume 253 596
